Use Table 1 to answer questions 138-142

The following table provides cost and price information for an individual firm. The first two columns represent the demand curve that the firm faces. The firm has a fixed amount of capital equipment, but can change the level of other inputs such as labour and materials. Calculate the missing values in the table, and use the table to answer questions 138 to 142. (Make sure you answer each question using the production level specified.)
