This study material has been prepared by the faculty of the Board of Studies. The objective of the study material is to provide teaching material to the students to enable them to obtain knowledge and skills in the subject. Students should also supplement their study by reference to the recommended text books. In case students need any clarifications or have any suggestions to make for further improvement of the material contained herein, they may write to the Director of Studies.

All care has been taken to provide interpretations and discussions in a manner useful for the students. However, the study material has not been specifically discussed by the Council of the Institute or any of its Committees and the views expressed herein may not be taken to necessarily represent the views of the Council or any of its Committees.

Permission of the Institute is essential for reproduction of any portion of this material.

A WORD ABOUT STUDY MATERIAL

The study material has been divided into two parts, namely, Volume I dealing with conceptual theoretical framework; and Volume II comprising of practice manual. The Study Material has been designed having regard to the needs of home study and distance learning students in mind. The students are expected to cover the entire syllabus and also do practice on their own while going through the practice manual. Volume I of the study material deals with the conceptual theoretical framework in detail. The main features of Volume I are as under:

- The entire syllabus has been divided into seven chapters.
- In each chapter, learning objectives have been stated. The learning objectives would enable you to understand the sequence of various aspects dealt within the chapter before going into the details so that you know the direction of your studies.
- In each chapter, an overview has been given just after the learning objectives. This overview provides a preview of the entire chapter and its relevance in the present context.
- Each chapter, has been covered in a step-by-step approach. The text has been explained, where appropriate, through illustrations and practical problems. You should go through the chapter carefully ensuring that you understand the topic.

Volume II of the Study Material comprises the Practice Manual. It aims to provide guidance as to the manner of writing an answer in the examination. Main features of Volume II are as under:

- Important definitions, and formulae have been given before each topic for quick recapitulation. Students may attempt the questions and then compare it with the actual answers.
- Compilation of questions appearing during last twenty four examinations.
- Exercises have been given at the end of each topic for independent practice.

- Attention is invited to the significant changes made in this edition of the study material on page no. ii.
- Please note that the changes over the previous edition have been indicated in **bold and italics** in the chapters.
- New illustrations have been added to explain the application of the existing concepts in some of the chapters and these have been indicated in grey background.

STUDY TIPS AND EXAMINATION TECHNIQUE

The aim of this section is to provide general guidance as to how to study for your examinations. The guidance given herein is supplementary to the manner of study followed by you and is intended to improve your existing technique, but aims to give ideas on how to improve your existing study techniques, as it is essential that you adopt methods and techniques with which you feel comfortable.

Passing exams is partly a matter of intellectual ability, but however accomplished you are in that respect you can improve your chances significantly by the use of appropriate study and revision techniques. In this section we briefly outline some tips for effective study during the earlier stages.

Know your Syllabus

- Go through the syllabus carefully.
- Volume I has been divided in seven chapters and units based on syllabus.
- Main topics are as under:
  - Scope and Objectives of Financial Management
  - Time Value Of Money
  - Financial Analysis and Planning
  - Financing Decisions
  - Types of Financing
  - Investment Decisions
  - Management of Working Capital
- Understand the linkages between chapters at macro-level.

Plan your Study

- Make a study plan covering the entire syllabus and then decide how much time you can allocate to the subject on daily/weekly basis.
- Allocation of time must be done keeping in view your office commitments as well as social needs and personal hobbies.
• Maintain the time balance amongst various subjects such as purely descriptive type and numerical-based papers. Allocate time in such a manner that your interest is well sustained and you are able to score well in the final examination as well.

• Always assess your preparation periodically, say, on monthly basis. If necessary, revise your plan and allocate more time for the subject in which you feel deficient.

Preparing Study Strategy

• Read, understand and assimilate each chapter.

• First of all, have an overview of the chapter to understand the broad contents and sequence of various sub-topics.

• Do the introspection while going through the chapter and ask various questions to yourself.

• Read each chapter slowly to ensure that you understand and assimilate the main concept. If need be, read once again with concentration and then try to attempt exercise at the end of the chapter or given in the Practice Manual.

• Recapitulate the main concept after going through each chapter by way of brief notes.

• Prepare notes in the manner you feel comfortable covering all key points. Use mnemonic form e.g. C V P denoting cost, valuation and price.

• One may use highlighter/underlining the significant points or writing down in the margin.

• The fact that how well you have understood the topic is your ability to attempt the questions given in the exercises as well as in the practice manual. Make a serious attempt at producing your own answers but at this stage do not be much concern about attempting the questions in examination based conditions. In particular, at initial stages, it is more important to understand and absorb the material thoroughly rather than to observe the time limits that would apply in the actual examination conditions.

• Always try to attempt the past year examination question paper under examination conditions.

• Revision of material should never be selective in any case. Because broad coverage of the syllabus is more important than preparing 2-3 chapters exhaustively.

• Read through the text along with notes carefully. Try to remember the definition and important formulae.

Examination Technique

• Reach examination hall well in time.
• Plan your time so that equal time is awarded for each mark. Keep sometime for revision as well.

• Always attempt to do all questions. Remember that six average answers fetch more marks than five best answers. Therefore, it is important that you must finish each question within allocated time.

• Read the question carefully more than once before starting the answer to understand very clearly as to what is required by the paper-setter.

• Always be concise and write to the point and do not try to fill pages unnecessarily.

• In case a question is not clear, you may state your assumptions and then answer the question.

• While writing answers in respect of essay-type questions, try to make sub-readings so that it catches the examiner’s eye. In case of case-study, be very precise and write your conclusion in a clear manner.

• Reference to standards, guidance notes, section of various legislation, etc be done in a clear-cut manner.

• Revise your answers carefully underline important points before leaving the examination hall.

Happy Reading and Best Wishes!
PAPER – 3 : COST ACCOUNTING AND FINANCIAL MANAGEMENT

(One paper — Three hours – 100 Marks)

Level of Knowledge: Working knowledge

PART – II : FINANCIAL MANAGEMENT (50 MARKS)

Objectives:
(a) To develop ability to analyse and interpret various tools of financial analysis and planning,
(b) To gain knowledge of management and financing of working capital,
(c) To understand concepts relating to financing and investment decisions, and
(d) To be able to solve simple cases.

Contents
1. Scope and Objectives of Financial Management
   (a) Meaning, Importance and Objectives
   (b) Conflicts in profit versus value maximisation principle
   (c) Role of Chief Financial Officer.
2. Time Value of Money
   Compounding and Discounting techniques— Concepts of Annuity and Perpetuity
3. Financial Analysis and Planning
   (a) Ratio Analysis for performance evaluation and financial health
   (b) Application of Ratio Analysis in decision making
   (c) Analysis of Cash Flow Statement.
4. Financing Decisions
   (a) Cost of Capital — Weighted average cost of capital and Marginal cost of capital
   (b) Capital Structure decisions — Capital structure patterns, Designing optimum capital
structure, Constraints, Various capital structure theories
(c) Business Risk and Financial Risk — Operating and financial leverage, Trading on Equity.

5. Types of Financing
(a) Different sources of finance
(b) Project financing — Intermediate and long term financing
(c) Negotiating term loans with banks and financial institutions and appraisal thereof
(d) Introduction to lease financing
(e) Venture capital finance.

6. Investment Decisions
(a) Purpose, Objective, Process
(b) Understanding different types of projects
(c) Techniques of Decision making: Non-discounted and Discounted Cash flow Approaches — Payback Period method, Accounting Rate of Return, Net Present Value, Internal Rate of Return, Modified Internal Rate of Return, Discounted Payback Period and Profitability Index
(d) Ranking of competing projects, Ranking of projects with unequal lives.

7. Management of Working Capital
(a) Working capital policies
(b) Funds flow analysis
(c) Inventory management
(d) Receivables management
(e) Payables management
(f) Management of cash and marketable securities
(g) Financing of working capital.
## CONTENTS

### CHAPTER 1 – SCOPE AND OBJECTIVES OF FINANCIAL MANAGEMENT

1. Introduction ................................................................................................................................... 1.1
2. Meaning of Financial Management ............................................................................................ 1.2
   2.1 Procurement of Funds .............................................................................................................. 1.3
   2.2 Effective Utilisation of Funds .................................................................................................. 1.5
3. Evolution of Financial Management ............................................................................................ 1.5
4. Importance of Financial Management ......................................................................................... 1.6
5. Scope of Financial Management .................................................................................................. 1.6
6. Objectives of Financial Management .......................................................................................... 1.8
   6.1 Profit Maximisation .................................................................................................................. 1.8
   6.2 Wealth / Value Maximisation .................................................................................................. 1.8
7. Conflicts in Profit versus Value Maximisation Principle ............................................................. 1.13
8. Role of Chief Financial Officer (CFO) ......................................................................................... 1.15
   8.1 Role of CFO in today’s World vis-a-vis in the past .............................................................. 1.16
9. Relationship of Financial Management with Related Disciplines ............................................. 1.17
   9.1 Financial Management and Accounting .............................................................................. 1.17
   9.2 Financial Management and Other Related Disciplines ....................................................... 1.18
Summary .......................................................................................................................................... 1.19

### CHAPTER 2 – TIME VALUE OF MONEY

1. Concept of Time Value of Money ............................................................................................... 2.1
2. Reasons Why Money in the Future is Worth Less Than Similar Money Today ....................... 2.2
3. Simple Interest ................................................................................................................................ 2.2
4. Compound Interest ..................................................................................................................... 2.3
   4.1 Compound Interest versus Simple Interest ............................................................................ 2.8
5. Effective Rate of Interest ............................................................................................................. 2.8

CHAPTER 4 – FINANCING DECISIONS

UNIT I: COST OF CAPITAL

1.1 Introduction .................................................................................................................. 4.1
1.2 Definition of Cost of Capital .......................................................................................... 4.3
1.3 Measurement of Cost of Capital .................................................................................... 4.3
  1.3.1 Cost of Debt ........................................................................................................... 4.4
  1.3.2 Cost of Preference Shares ..................................................................................... 4.8
  1.3.3 Cost of Equity ......................................................................................................... 4.9
  1.3.4 Cost of Retained Earnings ..................................................................................... 4.15

Summary .......................................................................................................................... 3.79
UNIT II: CAPITAL STRUCTURE DECISIONS

2.1 Meaning of Capital Structure ................................................................. 4.27
2.2 Designing Capital Structure .................................................................. 4.27
2.3 Key Concepts for Designing Optimal Structure ..................................... 4.28
  2.3.1 Leverages ......................................................................................... 4.29
  2.3.2 Coverage Ratio ............................................................................... 4.30
  2.3.3 Cash Flow Analysis ......................................................................... 4.30
2.4 Optimal Capital Structure ........................................................................ 4.30
2.5 EBIT-EPS Analysis .................................................................................. 4.30
2.6 Cost of Capital, Capital Structure and Market Price of Share .................. 4.40
2.7 Capital Structure Theories ......................................................................... 4.41
  2.7.1 Net Income Approach (NI) ............................................................... 4.41
  2.7.2 Net Operating Income Approach (NOI) .......................................... 4.43
  2.7.3 Modigliani-Miller Approach (MM) .................................................. 4.45
  2.7.4 Traditional Approach ..................................................................... 4.50
2.8 Capital Structure and Taxation ................................................................. 4.54
2.9 Over Capitalisation .................................................................................... 4.55
  2.9.1 Causes of Over Capitalisation ......................................................... 4.55
  2.9.2 Consequences of Over Capitalisation ............................................. 4.56
  2.9.3 Remedies for Over Capitalisation ................................................... 4.56
2.10 Under Capitalisation .................................................................................. 4.56
  2.10.1 Consequences of Under Capitalisation ......................................... 4.56
  2.10.2 Effects of Under Capitalisation ....................................................... 4.56
2.10.3 Remedies for Under Capitalisation ................................................................. 4.57
2.10.4 Over Capitalisation vis-à-vis Under Capitalisation ........................................ 4.57

UNIT III : BUSINESS RISK AND FINANCIAL RISK

3.1 Introduction ......................................................................................................... 4.58
  3.1.1 Business Risk and Financial Risk ............................................................... 4.58
3.2 Debt versus Equity Financing ............................................................................ 4.59
3.3 Types of Leverage ............................................................................................. 4.60
  3.3.1 Operating Leverage .................................................................................. 4.60
  3.3.2 Financial Leverage ................................................................................... 4.63
  3.3.3 Combined Leverage ................................................................................ 4.65
Summary .............................................................................................................. 4.71

CHAPTER 5 – TYPES OF FINANCING

1. Introduction ........................................................................................................... 5.1
2. Financial Needs and Sources of Finance of a Business ....................................... 5.2
  2.1 Financial Needs of a Business .................................................................... 5.2
  2.2 Sources of Finance of a Business ............................................................... 5.3
  2.3 Financial sources of a business can also be classified as follows by using different basis .............................................................. 5.3
3. Long Term Sources of Finance ........................................................................... 5.4
  3.1 Owners Capital or Equity Capital ................................................................. 5.4
  3.2 Preference Share Capital .......................................................................... 5.5
  3.3 Retained Earnings ..................................................................................... 5.6
  3.4 Debentures or Bonds ................................................................................. 5.6
  3.5 Loans from Financial Institutions ............................................................. 5.8
  3.6 Loans from Commercial Banks .................................................................. 5.8
4. Venture Capital Financing .................................................................................... 5.11
5. Debt Securitisation ............................................................................................. 5.13
5.1 Benefits to the Originator ................................................................. 5.14
6. Lease Financing .................................................................................. 5.14
   6.1 Types of Lease Contracts ............................................................... 5.14
   6.2 Other Types of Leases ................................................................. 5.16
7. Short Term Sources of Finance ............................................................. 5.17
   7.1 Trade Credit ................................................................................. 5.17
   7.2 Accrued Expenses and Deferred Income ................................. 5.17
   7.3 Advances from Customers ......................................................... 5.17
   7.4 Commercial Paper ................................................................. 5.17
   7.5 Bank Advances ................................................................. 5.17
   7.6 Financing of Export Trade by Banks ........................................ 5.20
   7.7 Inter Corporate Deposits ......................................................... 5.23
   7.8 Certificate of Deposit (CD) ......................................................... 5.23
   7.9 Public Deposits ......................................................................... 5.23
8. Other Sources of Financing ................................................................. 5.23
   8.1 Seed Capital Assistance ............................................................. 5.23
   8.2 Internal Cash Accruals ............................................................... 5.23
   8.3 Unsecured Loans ....................................................................... 5.24
   8.4 Deferred Payment Guarantee .................................................. 5.24
   8.5 Capital Incentives ...................................................................... 5.24
9. New Instruments ................................................................................. 5.24
   9.1 Deep Discount Bonds .............................................................. 5.24
   9.2 Secured Premium Notes ........................................................... 5.25
   9.3 Zero Interest Fully Convertible Debentures ......................... 5.25
   9.4 Zero Coupon Bonds ............................................................... 5.25
   9.5 Double Option Bonds ............................................................ 5.25
   9.6 Option Bonds ......................................................................... 5.25
CHAPTER 6 – INVESTMENT DECISIONS

1. Capital Budgeting Definition ............................................................... 6.1
2. Purpose of Capital Budgeting .............................................................. 6.2
3. Capital Budgeting Process ................................................................. 6.3
4. Types of Capital Investment Decisions ............................................... 6.3
   4.1 On the basis of firm’s existence .................................................. 6.3
   4.2 On the basis of decision situation .......................................... 6.4
5. Project Cash flows .............................................................................. 6.4
   5.1 Calculating Cash Flows ............................................................ 6.5
6. Basic Principles for Measuring Project Cash Flows ......................... 6.6
7. Capital Budgeting Techniques .......................................................... 6.9
   7.1 Payback Period ........................................................................ 6.10
   7.2 Payback Reciprocal ............................................................... 6.12
   7.3 Accounting (Book) Rate of Return (ARR) ............................... 6.12
   7.4 Net Present Value Technique (NPV) ......................................... 6.14
   7.5 Desirability Factor/Profitability Index/Present Value Index Method (PI) ................. 6.18
CHAPTER 7 – MANAGEMENT OF WORKING CAPITAL

UNIT I: MEANING, CONCEPT AND POLICIES OF WORKING CAPITAL

1.1 Introduction .......................................................................................................................... 7.2
1.2 Meaning and Concept of Working Capital ............................................................................ 7.2
   1.2.1 Importance of Adequate Working Capital ................................................................. 7.3
   1.2.2 Optimum Working Capital ......................................................................................... 7.4
1.3 Determinants of Working Capital ....................................................................................... 7.5
1.4 Issues in Working Capital Management ............................................................................. 7.6
   1.4.1 Current Assets to Fixed Assets Ratio ........................................................................ 7.6
   1.4.2 Liquidity versus Profitability ...................................................................................... 7.7
1.5 Estimating Working Capital Needs ....................................................................................... 7.8
1.6 Operating or Working Capital Cycle ..................................................................................... 7.9
   1.6.1 Working Capital Based on Operating Cycle ............................................................. 7.11
   1.6.2 Estimate of amount of different components of Current Assets and Current Liabilities .................................................................................................................. 7.12
   1.6.3 Working capital requirement estimation based on cash cost .................................. 7.16
   1.6.4 Effect of Double Shift Working on Working Capital Requirements ...................... 7.37

UNIT II: TREASURY AND CASH MANAGEMENT

2.1 Treasury Management: Meaning ......................................................................................... 7.40
2.2 Functions of Treasury Department ...................................................................................... 7.40
2.3 Management of Cash ........................................................................................................ 7.41
   2.3.1 The Need for Cash ..................................................................................................... 7.41
2.3.2 Cash Planning ......................................................................................................... 7.42
2.3.3 Cash Budget ............................................................................................................ 7.42

2.4 Methods of Cash Flow Budgeting ...................................................................................... 7.43
2.4.1 Cash budget for short period ................................................................................... 7.44
2.4.2 Cash Budget for long period .................................................................................... 7.53
2.4.3 Managing Cash Collection and Disbursements ....................................................... 7.58
2.4.4 Accelerating Cash Collections ................................................................................. 7.58
2.4.5 Controlling Payments .............................................................................................. 7.59
2.4.6 Determining the Optimum Cash Balance ................................................................. 7.62

2.5 Cash Management Models ................................................................................................ 7.62
2.5.1 William J. Baumol’s Economic Order Quantity Model (1952) ............................. 7.62
2.5.2 Miller-Orr Cash Management Model (1966) ............................................................ 7.64

2.6 Recent Developments in Cash Management ..................................................................... 7.65
2.6.1 Electronic Fund Transfer ........................................................................................ 7.65
2.6.2 Zero Balance Account ............................................................................................ 7.65
2.6.3 Money Market Operations ....................................................................................... 7.66
2.6.4 Petty Cash Imprest System ..................................................................................... 7.66
2.6.5 Management of Temporary Cash Surplus ............................................................... 7.66
2.6.6 Electronic Cash Management System .................................................................... 7.66
2.6.7 Virtual Banking ........................................................................................................ 7.67

2.7 Management of Marketable Securities ............................................................................. 7.68

UNIT III : MANAGEMENT OF INVENTORY
3.1 Inventory Management .................................................................................................... 7.70

UNIT IV : MANAGEMENT OF RECEIVABLES
4.1 Introduction ..................................................................................................................... 7.73
4.2 Aspects of Management of Debtors ............................................................................... 7.73
4.3 Factors Determining Credit Policy .................................................................................. 7.74
4.4 Factors under the Control of the Finance Manager ............................................................ 7.74
4.5 Financing Receivables ..................................................................................................... .. 7.81
4.6 Innovations in Receivable Management ............................................................................ 7.83
4.7 Monitoring of Receivables ................................................................................................. . 7.88

UNIT V : MANAGEMENT OF PAYABLES (CREDITORS)
5.1 Introduction .............................................................................................................. .......... 7.93
5.2 Cost and Benefits of Trade Credit ...................................................................................... 7.93
5.3 Computation of Cost of Payables ....................................................................................... 7.94

UNIT VI : FINANCING OF WORKING CAPITAL
6.1 Introduction .............................................................................................................. .......... 7.96
6.2 Sources of Finance ........................................................................................................ .... 7.96
   6.2.1 Spontaneous Sources of Finance ........................................................................... 7.96
   6.2.2 Inter-corporate Loans and Deposits ........................................................................ 7.97
   6.2.3 Commercial Papers ................................................................................................. 7.97
   6.2.4 Funds Generated from Operations ........................................................................... 7.98
   6.2.5 Public Deposits ........................................................................................................ 7.98
   6.2.6 Bills Discounting ...................................................................................................... 7.98
   6.2.7 Bill Rediscounting Scheme ...................................................................................... 7.98
   6.2.8 Factoring ............................................................................................................. ... 7.98
6.3 Working Capital Finance from Banks ................................................................................. 7.99
   6.3.1 Instructions on Working Capital Finance by Banks ................................................. 7.99
6.4 Forms of Bank Credit ......................................................................................................... 7.99
Summary ....................................................................................................................... ............. 7.100
