This Study Material has been prepared by the faculty of the Board of Studies. The objective of the Study Material is to provide teaching material to the students to enable them to obtain knowledge and skills in the subject. In case students need any clarifications or have any suggestions to make for further improvement of the material contained herein, they may write to the Director of Studies.

All care has been taken to provide interpretations and discussions in a manner useful for the students. However, the Study Material has not been specifically discussed by the Council of the Institute or any of its Committees and the views expressed herein may not be taken to necessarily represent the views of the Council or any of its Committees.

Permission of the Institute is essential for reproduction of any portion of this material.

Revised Edition : January, 2015
Website : www.icai.org
Department/ Committee : Board of Studies
E-mail : bosnoida@icai.in
ISBN No. : 978-81-8441-076-1
Price : ₹ 370/- (For All Modules)
Published by : The Publication Department on behalf of The Institute of Chartered Accountants of India, ICAI Bhawan, Post Box No. 7100, Indraprastha Marg, New Delhi-110 002, India.
Typeset and designed at Board of Studies.
Printed by : Repro India Ltd.
December/2015/P1869 (Reprint)
# CONTENTS

## MODULE – 1
- Chapter-1 : Developments in the Business Environment
- Chapter-2 : Decision Making Using Cost Concepts and CVP Analysis
- Chapter-3 : Pricing Decisions

## MODULE – 2
- Chapter 4 – Budget & Budgetary Control
- Chapter 5 – Standard Costing
- Chapter 6 – Costing of Service Sector
- Chapter 7 – Transfer Pricing
- Chapter 8 – Uniform Costing and Inter Firm Comparison
- Chapter 9 – Profitability Analysis - Product Wise / Segment Wise / Customer Wise

## MODULE – 3
- Chapter 10 – Linear Programming
- Chapter 11 – The Transportation Problem
- Chapter 12 – The Assignment Problem
- Chapter 13 – Critical Path Analysis
- Chapter 14 – Program Evaluation and Review Technique
- Chapter 15 – Simulation
- Chapter 16 – Learning Curve Theory

APPENDIX
CHAPTER 10 – LINEAR PROGRAMMING

10.1 Introduction........................................................................................................... 10.1
10.2 Graphical Method.................................................................................................. 10.3
10.3 Trial & Error method of solving Linear Programming Problem ......................... 10.11
10.4 The Simplex method for maximization problems ................................................. 10.14
10.5 Simplex method for minimization problems ......................................................... 10.21
10.6 Marginal value of a resource ............................................................................... 10.26
10.7 Some remarks..................................................................................................... 10.27
10.8 Practical applications of linear programming ....................................................... 10.28
10.9 Miscellaneous Illustrations .................................................................................. 10.30
10.10 Limitations of linear programming ....................................................................... 10.64

CHAPTER 11 – THE TRANSPORTATION PROBLEM

11.1 Introduction........................................................................................................... 11.1
11.2 Methods of finding initial solution to transportation problems................................. 11.3
11.3 Optimality test..................................................................................................... 11.10
11.4 Special cases...................................................................................................... 11.16
11.5 Maximization transportation problems ................................................................. 11.20
11.6 Prohibited routes................................................................................................. 11.23
11.7 Miscellaneous illustrations .................................................................................. 11.27
Summary ...................................................................................................................... 11.44

CHAPTER 12 – THE ASSIGNMENT PROBLEM

12.1 Introduction........................................................................................................... 12.1
12.2 The Assignment algorithm..................................................................................... 12.1
12.3 Unbalanced assignment problems ......................................................................... 12.7
CHAPTER 13 – CRITICAL PATH ANALYSIS

13.1 Introduction

13.2 General framework of PERT/CPM

13.3 Advantages of critical path analysis

13.4 Fundamentals of a CPA network

13.5 Critical path analysis

13.6 Distinction Between PERT & CPM

Summary

CHAPTER 14 – PROGRAM EVALUATION AND REVIEW TECHNIQUE

14.1 Introduction

14.2 Updating the network

14.3 Project crashing

14.4 Resource smoothing

14.5 Resource levelling

14.6 Miscellaneous Illustrations

14.7 A few comments on assumptions of PERT & CPM

14.8 Distinction between PERT & CPM

CHAPTER 15 – SIMULATION

15.1 Introduction

15.2 What is simulation?

15.3 Monte Carlo simulation

15.4 Simulation and inventory control

15.5 Miscellaneous illustrations

15.6 Random numbers table
CHAPTER 16 – LEARNING CURVE THEORY

16.1 Introduction ........................................................................................................... 16.1
16.2 Distinctive features of learning curve theory in manufacturing environment ........ 16.2
16.3 The learning curve ratio ........................................................................................ 16.2
16.4 Learning curve equation ........................................................................................ 16.4
16.5 Learning curve application .................................................................................... 16.4
16.6 Application of Learning Curve ............................................................................... 16.7
16.7 Financial Costs effected by Learning Curve .......................................................... 16.7
16.8 Important Consequences of learning curve in Management Accounting ............. 16.7
16.9 Limitations of learning curve theory ....................................................................... 16.7
Summary ...................................................................................................................... 16.9

APPENDIX
