Question 12

Explain how corporate social responsibility minimises the ecological damage and helps in achieving long-term objectives, so that the business may gain long-term profit maximization.

Answer

Corporate social responsibility and ecological damage: The business institution exists and flourishes only because it performs invaluable services to society. Society gives business its license to exist which may be revoked and amended at any time if they do not fulfill the society’s expectations. Therefore, if a business intends to retain its existing social role and power, it must serve society’s needs constructively.

A business organization acts in its own self interest and uses natural resources also. The effluents of many businesses damage the surrounding environment. By their own socially responsible behaviour, they can prevent government intervention if they are proactive in recognizing their ecological responsibility towards society. Companies must recognize that a strategy for corporate responsibility can play a valuable role not only in meeting the challenges of globalization by mitigating risks domestically and internationally, but also in providing benefits beyond risk management.

Question 13

Explain the meaning of the “Iron Law of Responsibility”. State the resulting benefits which may be acquired by achieving the long-term objectives through the business activities.

Answer

The Iron Law of Responsibility: The institution of business exists only because it performs invaluable services for society. Society gives business its license to exist and this can be amended or revoked at any time if it fails to live up to society’s expectations. Therefore, if a business intends to retain its existing social role and power, it must respond to society’s needs constructively. This is known as the “Iron Law of Responsibility”. In the long-term those who do not use power in a manner that society considers responsible, will tend to lose it.

Businesses have been delegated economic power and have access to productive resources of a community. They are obliged to use these resources for the common good of society so that more wealth for its betterment may be generated. Technical and creative resources are also
helpful to it. A business organisation sensitive to community needs would in its own self interest like to have a better community within which the business may be conducted. This way, the resulting benefits would be:

(a) Decrease in crime
(b) Easier labour recruitment
(c) Reduced employee absenteeism.
(d) Easier access to international capital, better conditions for loans on international money markets.
(e) Dependable and preferred as supplier, exporter, importer and retailer of responsibly manufactured components and products.

This way a better society would produce a better environment in which the business may gain long term profit maximization.

Question 14

State with reasons whether the following statements are correct or incorrect:

The phrase ‘Iron Law of Responsibility’ means that the institution of business exists only because it performs invaluable services towards its promoters.

Answer

Incorrect: The phrase “Iron Law of Responsibility” means the institution of business exists only because it performs invaluable services for society. Society gives business its license to exist and this can be amended or revoked at any time if it fails to live up to society’s expectations. Therefore, if a business intends to retain its existing social role and power, it must respond to society’s needs constructively rather than it performs invaluable services towards its promoters.

Question 15

State with reasons whether the following statements are correct or incorrect:

“The institution of business exists only if it fulfils the society’s expectations”

Answer

The given statement is Correct. It is the society which bestows upon businesses the authority to own and use land and natural resources. In return, society has the right to expect the productive organizations, enhancing the general interest of consumers, employees and community. Society may also expect that organizations to honour existing rights and limit their activities within the bounds of justice. So, under this ‘social contract’ between society and business, Business ethics provide the guidance as to regulation of the behavior of business enterprises and the minimal duties of the business professionals, including the consequences and complications of their actions. Thus, business ethics is that set of principles or reasons which should govern the conduct of business – whether at the individual or collective level by
the application of ethical reasoning to specific business situations and activities. Thus, it can be said that the institution of business exists only if it fulfills the society’s expectations.
