1. **(a) Audit Procedures in respect of Opening Balances for a New Audit Engagements:** As per SA 510 “Initial Audit Engagements – Opening Balances”, the auditor should undertake the following procedures in respect of opening balances in case of new audit engagement:

(i) The auditor shall read the most recent financial statements, if any, and the predecessor auditor’s report thereon, if any, for information relevant to opening balances, including disclosures.

(ii) The auditor shall obtain sufficient appropriate audit evidence about whether the opening balances contain misstatements that materially affect the current period’s financial statements by:

(a) Determining whether the prior period’s closing balances have been correctly brought forward to the current period or, when appropriate, any adjustments have been disclosed as prior period items in the current year’s Statement of Profit and Loss;

(b) Determining whether the opening balances reflect the application of appropriate accounting policies; and

(c) Performing one or more of the following:

(1) Where the prior year financial statements were audited, perusing the copies of the audited financial statements including the other relevant documents relating to the prior period financial statements;

(2) Evaluating whether audit procedures performed in the current period provide evidence relevant to the opening balances; or

(3) Performing specific audit procedures to obtain evidence regarding the opening balances.

If the auditor obtains audit evidence that the opening balances contain misstatements that could materially affect the current period’s financial statements, the auditor shall perform such additional audit procedures as are appropriate in the circumstances to determine the effect on the current period’s financial statements. If the auditor concludes that such misstatements exist in the current period’s financial statements, the auditor shall communicate the misstatements with the appropriate level of management and those charged with governance.

**(b)** As per SA 250 on “Consideration of Laws and Regulation in an Audit of Financial Statements”, the following are examples or matters indicating to the auditor about non-compliance with laws and regulations by management:

- Investigations by regulatory organisations and government departments or payment of fines or penalties.
- Payments for unspecified services or loans to consultants, related parties, employees or government employees.
- Sales commissions or agent’s fees that appear excessive in relation to those ordinarily paid by the entity or in its industry or to the services actually received.
- Purchasing at prices significantly above or below market price.
Unusual payments in cash, purchases in the form of cashiers’ cheques payable to bearer or transfers to numbered bank accounts.

Unusual payments towards legal and retainership fees.

Unusual transactions with companies registered in tax havens.

Payments for goods or services made other than to the country from which the goods or services originated.

Payments without proper exchange control documentation.

Existence of an information system which fails, whether by design or by accident, to provide an adequate audit trail or sufficient evidence.

Unauthorised transactions or improperly recorded transactions.

Adverse media comment.

(c) Generalisations about the reliability of audit evidence. The reliability of information to be used as audit evidence, and therefore of the audit evidence itself, is influenced by its source and its nature, and the circumstances under which it is obtained, including the controls over its preparation and maintenance where relevant. Therefore, generalisations about the reliability of various kinds of audit evidence are subject to important exceptions. Even when information to be used as audit evidence is obtained from sources external to the entity, circumstances may exist that could affect its reliability. For example, information obtained from an independent external source may not be reliable if the source is not knowledgeable, or a management’s expert may lack objectivity. While recognising that exceptions may exist, the following generalisations about the reliability of audit evidence may be useful:

- The reliability of audit evidence is increased when it is obtained from independent sources outside the entity.
- The reliability of audit evidence that is generated internally is increased when the related controls, including those over its preparation and maintenance, imposed by the entity are effective.
- Audit evidence obtained directly by the auditor (for example, observation of the application of a control) is more reliable than audit evidence obtained indirectly or by inference (for example, inquiry about the application of a control).
- Audit evidence in documentary form, whether paper, electronic, or other medium, is more reliable than evidence obtained orally (for example, a contemporaneously written record of a meeting is more reliable than a subsequent oral representation of the matters discussed).

Audit evidence provided by original documents is more reliable than audit evidence provided by photocopies or facsimiles, or documents that have been filmed, digitised or otherwise transformed into electronic form, the reliability of which may depend on the controls over their preparation and maintenance.

(d) Misappropriation of Goods: Fraud in the form of misappropriation of goods is still more difficult to detect; for this management has to rely on various measures. Apart from the various requirements of record keeping about the physical quantities and their periodic checks, there must be rules and procedures for allowing persons inside the area where goods are kept. In addition there should be external security arrangements to see that no goods are taken out without proper authority. Goods can be anything in the premises; it may be machinery. It may even be the daily necessities of the office like stationery. The goods may be removed by subordinate employees or even by persons quite higher up in the management. Auditors can detect this by undertaking a thorough and strenuous checking of records followed by physical verification process. Also, by resorting to intelligent ratio analysis, auditors may be able to form an idea whether such fraud exists. For example, the gross profit ratio adjusted for any recorded
change during the year, reveals whether the value of inventory is reasonable with reference to the amount of the sale. Similarly, the input-output ratio of production in terms of physical quantity may reveal whether output is normal with reference to the quantity consumed for production.

2.  (i) **Correct:** An audit is an independent examination of financial information of any entity, whether profit oriented or not, and irrespective of its size or legal form, when such an examination is conducted with a view to expressing an opinion thereon. It is clear that the basic objective of auditing, i.e., expression of opinion on financial statements does not change with reference to nature, size or form of an entity.

   (ii) **Incorrect:** ‘Substantive procedure’ may be defined as an audit procedure designed to detect material misstatements at the assertion level whereas ‘tests of controls’ is an audit procedure designed to evaluate the operating effectiveness of controls in preventing, or detecting and correcting, material misstatements at the assertion level.

   (iii) **Correct:** As explained in General Instructions for Preparation of Balance Sheet as per Schedule III, a receivable shall be classified as a ‘trade receivable’ if it is in respect of the amount due on account of goods purchased or services rendered in the normal course of business.

   (iv) **Incorrect:** NGOs registered under the Companies Act, 2013 must maintain their books of account under the accrual basis as required by the provisions of section 128 of the said Act. If the accounts are not maintained on accrual basis, it would amount to non-compliance of the provision of the Companies Act, 2013.

   (v) **Incorrect:** Teeming and Lading is one of the techniques of suppressing cash receipts and not of inflating cash payments. Money received from one customer is misappropriated and the account is adjusted with the subsequent receipt from another customer and so on.

   (vi) **Incorrect:** An audit conducted in accordance with the auditing standards generally accepted in India is designed to provide reasonable assurance that the financial statements taken as a whole are free from material misstatement, whether caused by fraud or error. The fact that an audit is carried out may act as a deterrent, but the auditor is not and cannot be held responsible for the prevention of fraud and error.

   (vii) **Correct:** SA 500 on ‘Audit Evidence’ expounds this concept. According to it, the sufficiency and appropriateness of audit evidence are interrelated. Sufficiency is the measure of the quantity of audit evidence. Appropriateness is the measure of the quality of audit evidence. SA 330 requires the auditor to conclude whether sufficient appropriate audit evidence has been obtained. Whether sufficient appropriate audit evidence has been obtained to reduce audit risk to an acceptably low level.

   (viii) **Incorrect:** As per section 141(3) of the Companies Act, 2013, a person shall not be eligible for appointment as an auditor of a company whose relative is a Director or is in the employment of the Company as a director or key Managerial Personnel.

   (ix)** Incorrect:** Internal control can provide only reasonable but not absolute assurance that its objective relating to prevention and detection of errors/frauds, safeguarding of assets etc., are achieved. This is because it suffers from some inherent limitations.

   (x) **Incorrect:** The method which involves dividing the population into groups of items is known as cluster sampling whereas block sampling involves the selection of a defined block of consecutive items.

3.  (a) **Qualities of Auditors:** The auditor should possess specific knowledge of accountancy, auditing, taxation, etc. which are acquired by him during the course of his theoretical education.

    The auditor should also have sufficient knowledge of general principles of law of contracts, partnership; specific statutes and provisions applicable, e.g. Companies Act, 2013, Co-operative Societies Act, etc.; client’s nature of business and its peculiar features. Apart from the knowledge acquired by the auditor in the formal manner, the auditor should also possess certain
personal qualities such as, tact; caution; firmness; good temper; judgement; patience; clear headedness and commonsense; reliability and trust, etc.

In short, all those personal qualities required to make a good person contribute to the making of a good auditor. In addition, the auditor must have the shine of culture for attaining a great height. He must have the highest degree of integrity backed by adequate independence. In fact, SA 200 mentions integrity, objectivity and independence as one of the basic principles.

Auditing is a profession, calling for wide variety of knowledge to which no one has yet set a limit, the most useful part of the knowledge is probably that which cannot be learnt from books because its acquisition depends on the alertness of the mind in applying to ever varying circumstances, the fruits of his own observation and reflection; only he who is endowed with common sense in adequate measure can achieve it.

(b) As described in SA 200, the potential effects of inherent limitations are particularly significant in the case of misstatement resulting from fraud. The risk of not detecting a material misstatement resulting from fraud is higher than the risk of not detecting one resulting from error. This is because fraud may involve sophisticated and carefully organized schemes designed to conceal it, such as forgery, deliberate failure to record transactions, or intentional misrepresentations being made to the auditor. Such attempts at concealment may be even more difficult to detect when accompanied by collusion. Collusion may cause the auditor to believe that audit evidence is persuasive when it is, in fact, false. The auditor's ability to detect a fraud depends on factors such as the skillfulness of the perpetrator, the frequency and extent of manipulation, the degree of collusion involved, the relative size of individual amounts manipulated, and the seniority of those individuals involved. While the auditor may be able to identify potential opportunities for fraud to be perpetrated, it is difficult for the auditor to determine whether misstatements in judgment areas such as accounting estimates are caused by fraud or error.

(c) If management does not provide one or more of the requested written representations, the auditor shall:
   (a) Discuss the matter with management;
   (b) Re-evaluate the integrity of management and evaluate the effect that this may have on the reliability of representations (oral or written) and audit evidence in general; and
   (c) Take appropriate actions, including determining the possible effect on the opinion in the auditor’s report in accordance with SA 705.

4. (a) Refund of General Insurance Premium paid: The refund of insurance premium may be because of earlier provisional payment of premium or may be a policy might have been cancelled at a later date. The auditor should take following steps while vouching such refunds—
   (i) Ascertain the reasons for refund of insurance premium.
   (ii) Examine insurance policy or cover note to find out the amount of premium.
   (iii) Verify advice of refund received from the insurance company. When refund is admitted, the insurance company sends the advice. This will be evidence as a covering letter to the cheque for the refund. Sometimes, a cheque is issued after a receipt is sent in advance to the insurance company.
   (iv) Scrutinise correspondence between the insurance company and the client.
   (v) Check entries in the bank book or the bank statement. If necessary, the counterfoil of the pay-in-slips can also be verified.

(b) Profit or Loss Arising on Sale of Plots Held by Real Estate Dealer: The land holding in the case of real estate dealer will be a current asset and not a fixed asset. The same should, therefore, be valued at cost or market value, whichever is less.
Profit or loss arising on sale of plots of land by Real Estate Dealer should be verified as follows:

(i) Each property account should be examined from the beginning of the development with special reference to the nature of charges so as to find out that only the appropriate cost and charges have been debited to the account and the total cost of the property has been set off against the price realised for it.

(ii) This basis of distribution of the common charges between different plots of land developed during the period, and basis for allocation of cost to individual properties comprised in a particular piece of land should be scrutinised.

(iii) If land price lists are available, these should be compared with actual selling prices obtained. And it should be verified that contracts entered into in respect of sale have been duly sanctioned by appropriate authorities.

(iv) Where part of the sale price is intended to reimburse taxes or expenses, suitable provisions should be maintained for the purpose.

(v) The prices obtained for various plots of land sold should be checked with the plan map of the entire tract and any discrepancy or unreasonable price variations should be inquired into. The sale price of different plots of land should be verified on a reference to certified copies of sale deeds executed.

(vi) Out of the sale proceeds, provision should be made for the expenditure incurred on improvement of land, which so far has been accounted for.

(c) Goods sent out on sale or return basis

(i) Check whether a separate memoranda record of goods sent out on sale or return basis is maintained. The party accounts are debited only after the goods have been sold and the sales account is credited.

(ii) See that price of such goods is unloaded from the sales account and the trade receivable’s record. Refer to the memoranda record to confirm that on the receipt of acceptance from each party, his account has been debited and the sales account correspondingly credited.

(iii) Ensure that the goods in respect of which the period of approval has expired at the close of the year either have been received back subsequently or customers’ accounts have been debited.

(iv) Confirm that the inventory of goods sent out on approval, the period of approval in respect of which had not expired till the close of the year lying with the party, has been included in the closing inventory.

(d) Borrowing from Banks: Borrowing from banks may be either in the form of overdraft limits or term loans. In each case, the borrowings should be verified as follows:

(i) Reconcile the balances in the overdraft or loan account with that shown in the pass book(s) and confirm the last mentioned balance by obtaining a certificate from the bank showing the balance in the accounts as at the end of the year.

(ii) Obtain a certificate from the bank showing particulars of securities deposited with the bank as security for the loans or of the charge created on an asset or assets of the concern and confirm that the same has been correctly disclosed and duly registered with Registrar of Companies and recorded in the Register of charges.

(iii) Verify the authority under which the loan or draft has been raised. In the case of a company, only the Board of Directors is authorised to raise a loan or borrow from a bank.

(iv) Confirm, in the case of a company, that the restraint contained in Section 180 of the Companies Act, 2013 as regards the maximum amount of loan that the company can raise has not been contravened.
Ascertain the purpose for which loan has been raised and the manner in which it has been utilized and that this has not prejudicially affected the entity.

5. (a) **Government Expenditure Audit**: Audit of government expenditure is one of the major components of government audit conducted by the office of C & AG. The basic standards set for audit of expenditure are to ensure that there is provision of funds authorised by competent authority fixing the limits within which expenditure can be incurred. Briefly, these standards are explained below:

   (i) **Audit against Rules & Orders**: The auditor has to see that the expenditure incurred conforms to the relevant provisions of the statutory enactment and is in accordance with the financial rules and regulations framed by the competent authority.

   (ii) **Audit of Sanctions**: The auditor has to ensure that each item of expenditure is covered by a sanction, either general or special, accorded by the competent authority, authorising such expenditure.

   (iii) **Audit against Provision of Funds**: It contemplates that there is a provision of funds out of which expenditure can be incurred and the amount of such expenditure does not exceed the appropriations made.

   (iv) **Propriety Audit**: It is required to be seen that the expenditure is incurred with due regard to broad and general principles of financial propriety. The auditor aims to bring out cases of improper, avoidable, or in fructuous expenditure even though the expenditure has been incurred in conformity with the existing rules and regulations. Audit aims to secure a reasonably high standard of public financial morality by looking into the wisdom, faithfulness and economy of transactions.

   (v) **Performance Audit**: This involves that the various programmes, schemes and projects where large financial expenditure has been incurred are being run economically and are yielding results expected of them. Efficiency-cum-performance audit, wherever used, is an objective examination of the financial and operational performance of an organisation, programme, authority or function and is oriented towards identifying opportunities for greater economy, and effectiveness.

(b) **Audit of Hospital**: The audit points to be considered by the auditor during the audit of a Hospital are stated below:-

   (i) Vouch the Register of patients with copies of bills issued to them. Verify bills for a selected period with the patients' attendance record to see that the bills have been correctly prepared. Also see that bills have been issued to all patients from whom an amount was recoverable according to the rules of the hospital.

   (ii) Check cash collections as entered in the Cash Book with the receipts, counterfoils and other evidence for example, copies of patients bills, counterfoils of dividend and other interest warrants, copies of rent bills, etc.

   (iii) See by reference to the property and Investment Register that all income that should have been received by way of rent on properties, dividends, and interest on securities settled on the hospital, has been collected.

   (iv) Ascertain that legacies and donations received for a specific purpose have been applied in the manner agreed upon.

   (v) Trace all collections of subscription and donations from the Cash Book to the respective Registers. Reconcile the total subscriptions due (as shown by the Subscription Register and the amount collected and that still outstanding).

   (vi) Vouch all purchases and expenses and verify that the capital expenditure was incurred only with the prior sanction of the Trustees or the Managing Committee and that appointments and increments to staff have been duly authorised.
(vii) Verify that grants, if any, received from Government or local authority has been duly accounted for. Also, that refund in respect of taxes deducted at source has been claimed.

(viii) Compare the totals of various items of expenditure and income with the amount budgeted for them and report to the Trustees or the Managing Committee significant variations which have taken place.

(ix) Examine the internal check as regards the receipt and issue of stores; medicines, linen, apparatus, clothing, instruments, etc. so as to ensure that purchases have been properly recorded in the Inventory Register and that issues have been made only against proper authorisation.

(x) See that depreciation has been written off against all the assets at the appropriate rates.

(xi) Inspect the bonds, share scrips, title deeds of properties and compare their particulars with those entered in the property and Investment Registers.

(xii) Obtain inventories, especially of inventories and stores as at the end of the year and check a percentage of the items physically; also compare their total values with respective ledger balances.

6. (a) Under sub-section (3) of section 141 along with the Companies (Audit and Auditors) Rule, 2014, a person who, or his relative or partner is holding any security of or interest in the company or its subsidiary, or of its holding or associate company or a subsidiary of such holding company, shall not be eligible for appointment as an auditor of a company. It may be noted that the relative may hold security or interest in the company of face value not exceeding rupees one lakh.

Where a person appointed as an auditor of a company incurs any of the disqualifications mentioned in sub-section (3) after his appointment, he shall vacate his office as such auditor and such vacation shall be deemed to be a casual vacancy in the office of the auditor.

Applying the above provisions to the given problem, it may be concluded that Firm of RGS, Chartered Accountants is not eligible to continue as auditors. Firm shall vacate its office as auditor and such vacation shall be treated as casual vacancy.

(b) Appointment of Subsequent Auditors in case of Non Government Companies: Section 139(1) of the Companies Act, 2013 provides that every company shall, at the first annual general meeting appoint an individual or a firm as an auditor who shall hold office from the conclusion of that meeting till the conclusion of its sixth annual general meeting and thereafter till the conclusion of every sixth meeting.

The following points need to be noted in this regard-

(i) The company shall place the matter relating to such appointment of ratification by member at every Annual General Meeting.

(ii) Before such appointment is made, the written consent of the auditor to such appointment, and a certificate from him or it that the appointment, if made, shall be in accordance with the conditions as may be prescribed, shall be obtained from the auditor.

(iii) The certificate shall also indicate whether the auditor satisfies the criteria provided in section 141.

(iv) The company shall inform the auditor concerned of his or its appointment, and also file a notice of such appointment with the Registrar within 15 days of the meeting in which the auditor is appointed.

(c) Removal of Auditor before Expiry of Term: According to Section 140 (1) the auditor appointed under section 139 may be removed from his office before the expiry of his term only by a special resolution of the company, after obtaining the previous approval of the Central Government.
(1) The application to the Central Government for removal of auditor shall be made in Form ADT-2 and shall be accompanied with fees as provided for this purpose under the Companies (Registration Offices and Fees) Rules, 2014.

(2) The application shall be made to the Central Government within thirty days of the resolution passed by the Board.

(3) The company shall hold the general meeting within sixty days of receipt of approval of the Central Government for passing the special resolution.

It may be noted that before taking any action for removal before expiry of terms, the auditor concerned shall be given a reasonable opportunity of being heard.

By applying the above provisions, it may be concluded that the action of the company for removal of the auditor CA Z before expiry of term is not justified and auditor may be removed from his office only by following the above mentioned procedure.

(d) Reporting requirements regarding Fixed Assets under CARO, 2016 are:

(a) Whether the company is maintaining proper records showing full particulars, including quantitative details and situation of fixed assets;

(b) Whether these fixed assets have been physically verified by the management at reasonable intervals; whether any material discrepancies were noticed on such verification and if so, whether the same have been properly dealt with in the books of account;

(c) Whether the title deeds of immovable properties are held in the name of the company. If not, provide the details thereof;

7. (a) Examination in Depth: It implies examination of a few selected transactions from the beginning to the end through the entire flow of the transaction, i.e., from initiation to the completion of the transaction by receipt or payment of cash and delivery or receipt of the goods. This examination consists of studying the recording of transactions at the various stages through which they have passed. At each stage, relevant records and authorities are examined; it is also judged whether the person who has exercised the authority in relation to the transactions is fit to do so in terms of the prescribed procedure. For example, a purchase of goods may commence when a predetermined re-order level has been reached. The ensuing stages may be summarised thus:

(i) Requisitions are pre-printed, pre-numbered and authorised;
(ii) official company order, also sequentially pre-numbered, authorised and placed with approved suppliers only;
(iii) receipt of supplier’s invoice;
(iv) receipt of supplier’s statement;
(v) entries in purchases day book;
(vi) postings to purchase ledger and purchase ledger control account;
(vii) cheque in settlement;
(viii) entry on bank statement and returned “paid” cheque (if requested);
(ix) cash book entry;
(x) posting from cash book to ledger and control account, taking into account any discounts.
(xi) receipt of goods, together with delivery/advice note;
(xii) admission of goods to stores;
(xiii) indication, by initials or rubber stamp on internal goods inwards note, of compliance with order regarding specification, quantity and quality;
(xiv) entries in stores records.
It should be noted that the above list is not necessarily comprehensive, nor does its constituent stages inevitably take place in the sequence suggested. The important point to note is that from the moment it was realised that once a re-order level had reached, a chain of events was put in motion, together leaving what may be termed as “audit trail”. Each item selected for testing must be traced meticulously, and although sample sizes need not be large, they must, of course, be representative.

It is an acceptable practice to check a slightly smaller number of transactions at each successive stage within a depth test, on the statistical grounds (based on probability theory) that the optimum sample size decreases as the auditor’s “level of confidence” concerning the functioning of the system increases. Examination in depth has been found indispensable in modern auditing practice and, if intelligently conducted, its reconstruction of the audit trail reveals more about the functioning (or malfunctioning) of the client’s system in practice than the haphazard and mechanical approach to testing.

(b) Audit Trail: An audit trail refers to a situation where it is possible to relate ‘one-to-one’ basis, the original input along with the final output. The work of an auditor would be hardly affected if “Audit Trail” is maintained i.e. if it were still possible to relate, on a ‘one-to-one’ basis, the original input with the final output. A simplified representation of the documentation in a manually created audit trail.

For example, the particular credit notes may be located by the auditor at any time he may wish to examine them, even months after the balance sheet date. He also has the means, should he so wish, of directly verifying the accuracy of the totals and sub-totals that feature in the control listing, by reference to individual credit notes. He can, of course, check all detailed calculations, casts and postings in the accounting records, at any time.

In first and early second-generation computer systems, such a complete and trail was generally available, no doubt, to management’s own healthy scepticism of what the new machine could be relied upon to achieve – an attitude obviously shared by the auditor.

It is once iterated that there is an abundance of documentation upon which the auditor can use his traditional symbols of scrutiny, in the form of colored ticks and rubber stamps. Specifically:

(i) The output itself is as complete and as detailed as in any manual system.

(ii) The trail, from beginning to end, is complete, so that all documents may be identified by located for purposes of vouching, totalling and cross-referencing.

Any form of audit checking is possible, including depth testing in either direction.

(c) Intangible Assets: An intangible asset is that asset which does not have a physical identity but which is used by the enterprise for production or supply of goods or for retail or other or for administrative purpose. Such asset does not have any physical existence but their presence in the business is indicated with a value placed thereon. These assets include rights and benefit to owners subject to their being useful. For example: goodwill, patents, copyright etc. AS 26, “Intangible Assets”, applies to, among other things, expenditure on advertising, training, start-up, research and development activities. Research and development activities are directed to the development of knowledge. Therefore, although these activities may result in an asset with physical substance (for example, a prototype), the physical element of the asset is secondary to its intangible component, that is the knowledge embodied in it. This standard also applies to rights under licensing agreements for items such as motion picture films, video recordings, plays, manuscripts, patents and copyrights. An intangible asset should measured at cost. After initial recognition an intangible asset should be carried at its cost less any accumulated amortisation and any impairment losses.

Auditor should also ensure that proper disclosure is made in the financial statements about the carrying amount, amortisation methods, useful lives, etc.
(d) **Sweat Equity Shares:** As per section 54 of the Companies Act, 2013, the employees may be compensated in the form of "Sweat Equity Shares".

"Sweat Equity Shares" means equity shares issued by the company to employees or directors at a discount or for consideration other than cash for providing know-how or making available right in the nature of intellectual property rights or value additions, by whatever name called.

The auditor may see that the Sweat Equity Shares issued by the company are of a class of shares already issued and following conditions are fulfilled:

(a) the issue is authorised by a special resolution passed by the company;
(b) the resolution specifies the number of shares, the current market price, consideration, if any, and the class or classes of directors or employees to whom such equity shares are to be issued;
(c) not less than one year has, at the date of such issue, elapsed since the date on which the company had commenced business; and
(d) where the equity shares of the company are listed on a recognised stock exchange, the sweat equity shares are issued in accordance with the regulations made by the Securities and Exchange Board in this behalf and if they are not so listed, the sweat equity shares are issued in accordance with such rules as may be prescribed.

The rights, limitations, restrictions and provisions as are for the time being applicable to equity shares shall be applicable to the sweat equity shares issued under this section and the holders of such shares shall rank pari passu with other equity shareholders.

(e) **Audit of Capital Reserve:** A capital reserve is a reserve which is not available for distinction as dividend. The auditor should examine that the head 'capital reserves' does not include any amounts as are regarded as free for distribution as dividend. In the case of a company, if there is a capital profit on reissue of forfeited shares, it is to be shown under capital reserves.

The following are the duties for the Auditor in connection with the capital profit, which are not normally available for distribution to the shareholders unless:

(a) The Articles of the company permit such a distribution,
(b) It has been realised in cash.
(c) The assets value remaining after distribution of the profit will be not less than the book value so that share capital and reserves remaining after the distribution will be fully represented by the remaining assets.

Revaluation reserve is also not available for dividends. Further, the bonus share cannot be issued by capitalisation of revaluation reserve. If any company does so, the auditor should qualify his report.

It may however, be noted that revalued capital profits are distributable in the same way as other profits and that it is not necessary to comply condition (a) and (b) above. This is because AS 10 requires that any profit on sale of fixed asset has to be routed through the profit and loss account. A clear distinction should be made between capital profits and capital receipts. The latter cannot be distributed by way of dividend at all.

Auditor should also ensure that the presentation and disclosure requirements of Schedule III to the Companies Act, 2013 have been complied with.
